

WE'RE HIRING!

SUMMER 2026 RESEARCH TECHNICIANS

Multiple Positions Available

SPEND THE SUMMER AT HOLT RESEARCH FOREST IN ARROWSIC, MAINE.

Maine TREE Foundation is hiring multiple seasonal **Research Technicians** for the summer of 2026. Holt Research Forest Technicians will work **in the field** on the **Maine coast** as part of a **research team**, collect **ecosystem data** to contribute to ongoing ecological monitoring studies, assist with **stewardship** projects, and conduct an **independent research project** to communicate Holt Research Forest findings to relevant audiences.

What is Holt Research Forest?

Ecological monitoring at Holt Research Forest began in 1983. Located on an island, this 350-acre woodland is the only research forest studying oak-pine forest systems on Maine's coast. Holt Research Forest aims to support regional family forest owners by generating, communicating, and demonstrating best practices of climate-smart active management in Maine's midcoast region.

Ideal candidates will be:

- Able to identify native tree species
- Familiar with forest sampling methods and/or have other data collection experience
- Excellent at communicating in a team setting
- Willing and able to work outdoors safely in poor weather conditions while carrying field equipment
- Respectful of team members, with demonstrated responsibility in a professional setting

Work location is in Arrowsic, Maine (<1 hr from Portland, close to Bath and Brunswick). On-site housing is available. Research Technicians will work 36 hours/week for 8-12 weeks from May through August at \$18/hour. To apply, please send **a cover letter, resume, and contact information for three references** to **paulina@mainetree.org**. Please contact Paulina Murray at paulina@mainetree.org with any questions.
